

Immediately know when your guards enter the water.

### Meet LEA.

LEA (Lifeguard Entry Alert) system automatically alerts your facility should a lifeguard have to enter the water.

The system uses small, lightweight wireless Lifeguard Tags which easily and securely attach to your guards' clothing or equipment.

LEA can monitor up to 10 Lifeguard Tags and is designed to work with or without our WAVE Swimmer Safety Systems.

LIFEGUARD ENTRY ALERT SYSTEM

**Gives your aquatics team the tools they need to succeed.**

If any of your guards wearing Lifeguard Tags enter the water for any reason, LEA will immediately alert your facility via a flashing strobe light, adjustable-volume speaker, and remote notifications\*

\* WiFi required. Subscription plan may apply.
